BUILDING · CONSERVATION

NORTHERN IRELAND BRANCH

The UK and Ireland has committed to net zero by 2050. Traditional, built heritage or just plain older buildings present amazing opportunities to reduce energy use and taking advantage of the existing embodied carbon. The challenges of retrofit are many, including protecting the external integrity & the historic fabric / traditional construction from inappropriate or un-informed intervention or 'improvements'. Our 3 speakers will share their experiences as they have wrestled with this subject.

VENUE

The Majestic

208-212 Lisburn Rd, Belfast BT9 6GD
